

Project Name: Bongo Seek AI

Document Type:

User Manual: This document provides a comprehensive guide on using Bongo Seek AI, including its features, tools & techniques, system functionalities, and user instructions.

Introduction:

Bongo Seek AI is a cutting-edge, AI-powered chatbot designed to deliver intelligent, context-aware responses in the Bengali language. Built on DeepSeek AI algorithms, it provides users with an intuitive and seamless conversational experience. With a focus on accuracy, efficiency, and ease of use, Bongo Seek AI integrates user authentication, search history tracking, and a multi-tab navigation system to enhance productivity. The system is designed to cater to both general users and administrators, ensuring secure access, robust data management, and an optimized interactive interface.

System Features:

- **Secure User Authentication** – Ensures safe login and registration for users.
- **Intelligent AI Chatbot** – Provides real-time, context-aware responses using DeepSeek AI algorithms.
- **User-friendly Interface** – Developed with a responsive and interactive design using React for an intuitive experience.
- **Personalized User Experience** – Adapts responses based on user history and preferences.
- **Scalability** – Designed to support increasing user demands and future expansions.
- **Cross-platform Compatibility** – Accessible from desktops, tablets, and mobile devices.
- **Data Security & Privacy** – Ensures encryption and secure storage of user data.

Tools/Techniques:

Backend Technologies:

- **Python (Flask)** – Handles server-side operations and API communication.
- **Hugging Face (Deep Seek 1.5B Model)** – Provides advanced AI language processing.
- **MySQL** – Manages user data, search history, and authentication records.
- **Flask-JWT-Extended** – Implements secure authentication and session management.
- **Flask-Bcrypt** – Ensures password security with hashing.
- **PyMySQL** – Facilitates database connectivity and queries.

Frontend Technologies:

- **React.js** – Powers the interactive and dynamic user interface.
- **Tailwind CSS** – Ensures a modern, responsive design for better usability.
- **Node.js** – Provides additional processing capabilities where required.

Third-Party Integrations:

- **Hugging Face Transformers** – Enhances AI capabilities for accurate responses.
- **Two-Step Verification** – Strengthens user authentication for improved security.

- **Email (SMTP for OTP verification)** – Implements secure email-based authentication mechanisms.
- **JWT Authentication** – Secures user sessions and prevents unauthorized access.
- **Data Encryption** – Ensures sensitive information is stored and transmitted securely.
- **Performance Optimization** – Implements caching techniques and efficient database queries for fast responses.

Development Applications:

- Visual Studio Code – Primary code editor for frontend and backend development.
- Git & GitHub – Enables version control and collaborative development.
- XAMPP – Utilized for local MySQL database management and backend testing.

User Manual:

Verify Your Email

Enter the verification code sent to your email.

Verify

User Login

1. Click on **Login**.
2. Enter registered email and password.
3. Click the "Login" button. After logging in, the website redirects to the chat page, where you can browse and interact with the AI chatbot.

Here is the **login** page:

The image shows a login page for 'Tongoseek'. At the top, the 'Tongoseek' logo is displayed in green. Below the logo, the heading 'Login to your account' is centered in bold black text. Underneath the heading, a subtitle reads 'Enter your email and password to log in'. The form consists of two input fields: 'Email' and 'Password'. The 'Email' field has a placeholder text 'Enter your email'. The 'Password' field has a placeholder text 'Enter your password'. To the right of the password field, there is a blue link that says 'Forgot password?'. Below the input fields is a large green button with the text 'Log in' in white. At the bottom of the form, there is a link that says 'Don't have an account? Sign up'.

Chatbot Interaction:

1. Enter your query in the chatbot input field.
2. Press **Enter** or click the **Send** button.
3. The AI will process and deliver a response promptly.

Logging Out

1. Click the **Logout** button to securely exit your account.

Conclusion:

Bongo Seek AI is a state-of-the-art AI-driven chatbot tailored. Its secure authentication, seamless search history tracking, and interactive user interface provide an efficient and engaging experience. Future enhancements may include forgot password, Bengali language support, search history tracking, and a multi-tab navigation system to enhance productivity, voice recognition, multilingual support, and advanced AI capabilities for improved user satisfaction.
